Contract 50-PAPT-4-00043
Attachment 1

Resource Estimates & Modifications to Task Orders

Authorized Task Orders may require modification from time to time, within the scope of the task, for a variety of reasons. The need for Task Order modifications may be identified by either the contractor or USPTO. Task Order modifications must be approved by the COTR and authorized by the Contracting Officer prior to implementation of changes.

Resource estimates conforming to the requirements of contract deliverable FN07 are required by the contractor whenever Task Order modifications are required that may affect the Task Order cost, scope of work, or period of performance. A resource estimate may be requested by either the USPTO or the contractor. If the initiative comes from the contractor, then the contractor must inform the appropriate USPTO Task Order Manager of the need for the resource estimate and provide an estimate of the cost. If the initiative begins with the USPTO, the appropriate Task Order Manager will inform the COTR of the need. Whether the USPTO or the contractor initiates a resource estimate, it is imperative that the request be addressed with the COTR since this is the only person which may authorize the contractor to proceed with development of a resource estimate.

The contractor shall deliver 5 copies of the resource estimate (FN07) to the PTO. One copy shall be delivered to the Contracting Officer and the remaining four shall be delivered to the COTR. Upon receipt by the COTR, the resource estimate will be routed for Task Order Manager and Program Manager review, approval, and, if necessary, funding. The Task Order Manager's review shall encompass both the scope of the work to be performed and the appropriateness of the cost estimate. The Task Order Manager will review the resource estimates of less than \$50,000 within 3 working days and resource estimates exceeding \$50,000 within 7 working days. If resource estimates require any minor changes or revisions, these will be annotated on the resource estimate and the resource estimate will be processed. Only when the resource estimate is to be totally rewritten will a new revised resource estimate be requested from SAIC.

When the Task Order Manager and the Program Manager approve the FN07, they must provide a CD-435 if the FN07 increases the cost of the task order. The FN07 and the CD-435 are submitted to the Technical Plans, Policy, and Oversight Staff (TPPOS) for funds processing. After the funding has been approved, the FN07 is returned to the COTR who will send the FN07 and the approval letter to the Contracting Officer.

The CO will then notify the contractor of the PTO's approval or rejection.

USPTO/TPPOS Contractor Actuals Data File Requirements
March 1999

A. Actuals are provided monthly via flat ASCII file.

1. The file is due on the 18th of each month and contains data for the previous month.
2. The format is Comma Separated Values.
3. Quotation marks surrounding individual values are optional.
4. Do not format dollar values with commas (,) or dollar signs (\$).

B. The following fields must be provided in the order shown:

1. Contractor Code - Contact TPPOS, who will assign a four-character code . Some acceptable values:

PRCS - Planning Research Corp, Inc.	GALX - Galaxy Scientific Corporation
SAIC - SAIC	COMP - Compass
LEAD - Leads	TROY - Troy Systems
SGNL - Signal Corporation	MITE - Mitech
FEDS - Fedstim	

2. Month and Year (Format MMM-YY)
3. Task Order Number (include the dash "-"; must use the correct number, i.e. 99-03 instead of 99-3)
4. Program Code (Only valid program codes may be used.)
5. Actual Hours
6. Actual Labor Dollars (Fully Loaded)
7. Actual Non-Labor Dollars (ODC's, Material, Services)

Sample data is provided in Section E.

C. If a contractor needs to re-submit a revised or corrected file, re-submission will be accepted provided the corrected file contains data for a single reporting period, e.g., September 1995, and contains all actuals for that period.

D. Files are named using the following convention:

`<code>_act.<month>`

The `<code>` is an acceptable contractor code, as shown under section B above.

The `<month>` is a three letter code identifying the reporting month, i.e., the month identified to the data contained in the file.

For example: file `prcs_act.sep` contains September actuals from PRC, i.e., actuals reported *against* the month of September, *not* actuals that were provided *in* the month of September.

Using this convention, even if a re-submission is required several months later, the file name always identifies *what* the file contains, not *when* the file was created.

E. Sample Data File:

```
prcs_act,MAR-99,99-01,ABCGBO,148,1327.8,1200.50

- C. If a contractor needs to re-submit a revised or corrected file, re-submission will be accepted provided the corrected file contains data for a single reporting period, e.g., September 1995, and contains all actuals for that period.**

D. Files are named using the following convention:

`<code>_act.<month>`

The `<code>` is an acceptable contractor code, as shown under section B above.

The `<month>` is a three letter code identifying the reporting month, i.e., the month identified to the data contained in the file.

For example: file `prcs_act.sep` contains September actuals from PRC, i.e., actuals reported *against* the month of September, *not* actuals that were provided *in* the month of September.

Using this convention, even if a re-submission is required several months later, the file name always identifies *what* the file contains, not *when* the file was created.
